Quarterly Activities Report For The Period Ending 31 December 2017

For personal use only

Highlights for the quarter ending 31 December 2017

- Accent Resources have planned RC and Diamond drilling on the Magnetite Range Project E59/875. A review of Drill company tenders is taking place. POW Application 69657 is pending.
- A high level technical strategic review was completed on the Norseman Gold Project (NGP); recommendations have been prioritised. Mining Lease Heritage Agreement negotiations for NGP are progressing. P63/2052 application was granted on 26 October 2017.
- The Meekatharra Gold Project has a total of 41 identified exploration targets from magnetics and historical drilling for orogenic gold, drill planning has been completed for the top ranked target and drill tenders will commence during the next quarter.
- Sitework was completed at Lot 163 England Crescent within the Perenjori light industrial area in preparation for the arrival of samples for storage.
- The Company continues to concentrate on the identification of investment opportunities in the resources sector and is targeting projects which are generating or will generate positive cashflow.

Corporate

In conjunction with majority shareholder Xingang Resources (HK) Limited and Rich Mark Development the Company continues to assess investment opportunities and projects for acquisition or development.

MZI Resources Ltd (ACS 4.3%)

The Company announced on 30th November 2015 that it had acquired a substantial shareholding in MZI Resources (“MZI”) which is a listed West Australian mineral sands producer (ASX Code: MZI). MZI carried out a \$43million share placement in 3 Tranches, the first 2 of which the Company participated in. The Company acquired 10m shares or 6.25% of MZI at an issue price of 40 cents for a total consideration of \$4.0 million. The third Tranche of MZI placement, which took place in late February 2016, and subsequent share issues have diluted the Company’s interest to 4.7%.

The Company funded its participation in the MZI placement by way of a \$4 million loan facility extended by the Company’s major shareholder Xingang Resources (HK) Ltd.

In November 2015 MZI commissioned a mineral sands mine at Keysbrook which is 70kms south of Perth. During 2016 the project was expected to ramp up to its initial production target of 96ktpa of leuconite (L70 and L88) and zircon concentrate comprising 38ktpa of L88, 29ktpa of L70 and 29ktpa of zircon concentrate. However despite the project being completed on time and within budget operating performance in 2016 was disappointing with production being at 55%-60% of design capacity and operating costs being above budget. Performance in 2016 was affected by below design level recoveries in the WCP (necessitating an additional 48 spirals to be installed) and mining problems caused by equipment breakdown, long haul distances and noise restrictions limiting 24 hour operations.

In November 2016 MZI announced a Board and Management transition with Mr Rod Baxter becoming the new Chairman and Mr Steve Ward becoming the interim Managing Director. At the same time it also advised that a US\$16m debt funding package had been provided by the major shareholder Resource Capital Fund VI LP. The funding package was for expenditure on plant modifications and working capital.

Since early 2017 the operations have been performing better with design level recoveries being achieved, new mining equipment being installed, and mining taking place at a new area which has reduced haul distances and allowed 24 hour operations. In early May 2017 MZI announced that it had appointed a new Managing Director MR Martin Purvis who commenced on 1st July 2017. Later that month it announced that it had secured an additional US\$5m funding package from RCF for land acquisition.

For personal use only

In September 2017 MZI announced a loss of \$31.4m was incurred in the year to June 2017. Saleable production was 62.5kt and revenue was \$39.6m. It also announced a new operating plan to increase Keybrook's ore throughput to 5.25mtpa. The cost of this expansion is being funded by a further US\$5m loan from RCF. MZI is targeting a 50% increase in saleable production and a 25-30% reduction in unit costs in 2017/18 compared with 2016/17. In 2017/18 it is forecasting saleable production of 96kt and revenue of \$69m and in 2018/19 saleable production of 116kt and revenue of \$87m. It is forecasting sustainable operating cashflows from June 2018 quarter.

Keysbrook is a high value, low cost operation and is expected to be the world's largest primary producer of leucoxene. With resources equivalent to 30 years mine life at initial production rates it has significant expansion potential. The Keysbrook project has mineral resources totalling 146.8mt at 2.0% heavy mineral content and within these resources Proved and Probable Reserves are 58 mt at 2.3% heavy mineral grade. The reserves are sufficient for 12 years at the initial production rate.

Magnetite Range Iron Ore Project (ACS 100%)

The Company's wholly owned Magnetite Range Project ('MRP') is located in the Midwest region of Western Australia, immediately adjacent to the Extension Hill iron ore mine, and contains a total JORC resource of **434.5 Mt at 31.4% Fe** at 15% weight recovery cut off, as announced to the ASX on 28 November 2012.

A high level technical review was completed by an independent engineering consultancy to complete an initial 'Gap' analysis on current metallurgical and scoping level data. Several recommendations were highlighted and further work has commenced.

An RC/DD drill program has been designed over E59/875 and M59/166. POW Application ID **69651** was submitted on 6th November 2017 and is currently pending. Drill tenders have been received back and are currently under review. It is anticipated a drill contractor will be finalised early 2018, with drilling to commence shortly after dependant on grant of POW69651 application (**See Figure 1**). E59/1732 expired during the quarter.

Site work was completed at Lot 163 England Crescent, Perenjori which included the spreading and compaction of a 100mm layer of gravel onsite. This 3,850sqm lot is now ready to provide secure storage of samples currently in the field. The location of Lot 163 is ideally placed as a regional base or hub for the future development of the Magnetite Range Iron Project.

The Company remains committed to development of the project and continue to review land access, infrastructure and corporate options.

Figure 1 – Magnetite Range 2017 Proposed Drilling Area(s) – POW69651 Application Pending

Norseman Gold Project (ACS 100%)

The Norseman Gold Project occurs within a strongly mineralised portion of the southern Norseman-Wiluna greenstone belt and is located 5km south of the Norseman town site.

A JORC 2004 Code Mineral Resource for Iron Duke and Surprise deposits of **1,039,400 tonnes @ 1.8 g/t Au for 59,500 ounces** (99 percentile upper cut, 1.0 g/t Au lower cut off) was announced to the ASX on 26 November 2012. Over 70-80% of the resource is shallow, within 50m of surface.

The 2012 review and resource estimation exercise clearly demonstrated that additional drilling is required to test deeper potential and newly identified zones, an update of the existing 2012 optimisation studies was completed by external engineering consultants and results of the updated optimisations were used to complete a high level geological technical strategic review of the project. This high level Strategic Review was finalised on 24th December 2018 by Cube Consulting. Recommendations are in the process of being prioritised.

Mining Lease application (M63/657) applied for on 3 September 2015 is pending with the WA Department of Mines, Industry Regulation and Safety. This application seeks to convert 7 contiguous granted Prospecting Licences and 5 contiguous granted Mining Leases into one consolidated Mining Lease (M63/657). The 12 tenements are P63/1380-1381; P63/1383-1384; P63/1642; P63/1893; P63/1904; M63/225-226; M63/229; M63/247 and M63/369 (**See figure 2**). Mining Lease Agreement Native Title negotiations are progressing for M63/657.

P63/2052 was pegged and an application submitted on 20th June 2016, this tenement was granted during the quarter on 26 October 2017; recommendations for Year 1 exploration are due next quarter.

Arcadia Gold Project - Meekatharra (ACS 100%)

The Arcadia-Meekatharra gold project (E51/1209) is located in the southern portion of the Abbots greenstone belt some 45km south west of Meekatharra and 30km south west of Bluebird gold mine (Metals X) in the Murchison district of Western Australia.

The project is an early stage exploration project with historical exploration confined to limited historical drilling at the Hope River Prospect.

Previous work on the tenement includes drilling, soil surveys, geological mapping and historical geophysical surveys over parts of the tenement. Due to the lack of subsurface information and a high proportion of salt lake cover, gravity and aerial magnetic surveys were completed during 2016 to help define geological architecture and preliminary local scale target definition.

A total of 41 targets for orogenic gold were identified and ranked, based on a combination of empirical evidence, conceptual ideas, analogous and/or unusual magnetic responses, interpreted structural settings and historical mapping. A review of this data has seen RC planning over a high priority target located on the edge of a Salt Lake and east of historical drilling. A logistics and budgeting exercise has commenced.

Competent Persons Statement

The information in this report that relates to Exploration Results, Mineral Resource and Ore Reserves is based on information compiled by Ms George Morton, a Competent Person who is a Member of the Australian Institute of Geoscientists. Ms Morton is a full time employee of Accent Resources NL. Ms Morton has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Ms Morton consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.
